Portfolio Strategy

BMO Global Infrastructure Index ETF has been designed to replicate, to the extent possible, the performance of the Dow Jones Brookfield Global Infrastructure North American Listed Index (Index), net of expenses. The ETF invests in and holds the Constituent Securities of the Index in the same proportion as they are reflected in the Index.

Benchmark Info

The Dow Jones Brookfield Global Infrastructure North American Listed Index (Index) is a float-adjusted market capitalization weighted Index. To be eligible for inclusion in the Index, a company must have a minimum float-adjusted market capitalization of US\$500 million as well as a minimum three-month average daily trading volume of US\$1 million. Securities of constituent issuers also must be listed in Canada or the United States. More than 70% of a potential constituent issuer's cash flows must be derived from the development, ownership, lease, concession or management of infrastructure assets.

Growth of \$10,000

The graph illustrates the impact to an initial investment of \$10,000 from the dates reflected. It is not intended to reflect future returns on investments in the BMO Global Infrastructure Index ETF. The index performance returns is for illustrative purposes only and the returns do not reflect any management fees, transaction costs or expenses. Investors cannot invest directly in an index.

Risk Rating

LOW	LOW TO MEDIUM	MEDIUM	MEDIUM TO HIGH	HIGH
-----	---------------	--------	----------------	------

All investments involve risk. The value of an ETF can go down as well as up and you could lose money. The risk of an ETF is rated based on the volatility of the ETF's returns using the standardized risk classification methodology mandated by the Canadian Securities Administrators. Historical volatility doesn't tell you how volatile an ETF will be in the future. An ETF with a risk rating of "low" can still lose money. For more information about the risk rating and specific risks that can affect an ETF's returns, see the BMO ETFs' prospectus.

Distribution yields are calculated by using the most recent regular distribution, or expected distribution, (which may be based on income, dividends, return of capital, and option premiums, as applicable) and excluding additional year end distributions, and special reinvested distributions annualized for frequency, divided by current net asset value (NAV). The yield calculation does not include reinvested distributions. **Distributions are not guaranteed, may fluctuate and are subject to change and/or elimination. Distribution rates may change without notice (up or down) depending on market conditions and NAV fluctuations.** The payment of distributions should not be confused with the BMO ETF's performance, rate of return or yield. If distributions paid by a BMO ETF are greater than the performance of the investment fund, your original investment will shrink. Distributions paid as a result of capital gains realized by a BMO ETF, and income and dividends earned by a BMO ETF, are taxable in your hands in the year they are paid. Your adjusted cost base will be reduced by the amount of any returns of capital. **If your adjusted cost base goes below zero, you will have to pay capital gains tax on the amount below zero.**

Cash distributions, if any, on units of a BMO ETF (other than accumulating units or units subject to a distribution reinvestment plan) are expected to be paid primarily out of dividends or distributions, and other income or gains, received by the BMO ETF less the expenses of the BMO ETF, but may also consist of non-taxable amounts including returns of capital, which may be paid in the manager's sole discretion. To the extent that the expenses of a BMO ETF exceed the income generated by such BMO ETF in any given month, quarter, or year, as the case may be, it is not expected that a monthly, quarterly, or annual distribution will be paid. Certain BMO ETFs have adopted a distribution reinvestment plan, which provides that a unitholder may elect to automatically reinvest all cash distributions paid on units held by that unitholder in additional units of the applicable BMO ETF in accordance with the terms of the distribution reinvestment plan. For further information, see the distribution policy in the BMO ETFs' prospectus.

Commissions, management fees and expenses all may be associated with investments in BMO ETFs and ETF Series of the BMO Mutual Funds. Please read the ETF facts or prospectus of the relevant BMO ETF or ETF Series before investing. The indicated rates of return are the historical compounded total returns including changes in share or unit value and the reinvestment of all dividends or distributions and do not take into account the sales, redemption, distribution, optional charges or income tax payable by the unitholder that would have reduced returns BMO ETFs and ETF Series are not guaranteed, their values change frequently, and past performance may not be repeated.

For a summary of the risks of an investment in the BMO ETFs or ETF Series of the BMO Mutual Funds, please see the specific risks set out in the prospectus. BMO ETFs and ETF Series trade like stocks, fluctuate in market value and may trade at a discount to their net asset value, which may increase the risk of loss. Distributions are not guaranteed and are subject to change and/or elimination.
